

STRATEGIC DIRECTION THROUGH INFORMATION MANAGEMENT

NEW AUTOMATED COST ANALYSIS PROGRAM WILL INCREASE LTAC PROFITABILITY

Morrison Informatics, Inc., announces the availability of a new Cost Analysis Program (CAP) that will predict LTAC patient costs and increase profitability. CAP is the only product available that allows hospitals to correctly estimate short stay case profit and loss based on discharge dates.

CAP Features:

- **Provides instant P/L projection of SSO cases based on discharge date choices and identifies optimal discharge dates**
- **Reduces losses for SSO cases**
- **Provides hospital specific reimbursement estimates**
- **Identifies high cost outlier dates for long-stay patients**
- **Provides cost comparisons by departments compared to national norms and identifies high cost areas**
- **Continuously updated with CMS regulatory changes and most recent hospital data**
