STRATEGIC DIRECTION THROUGH INFORMATION MANAGEMENT

HOSPITAL MARKET REPORTS IDENTIFY POST-ACUTE CARE DISCHARGES

Morrison Informatics provides market reports for LTCHs, IRFs and SNFs, which identify appropriate acute care discharges from hospitals in local and regional market areas. These reports are used to assist in locating and identifying appropriate admissions and to improve cost-effectiveness of acute care hospitals.

Features of Hospital Market Reports:

- **Detailed analysis by acute care hospital DRGs, lengths of stay, P/L and discharge destination**
- **Actual and projected acute care hospital P/L and cost savings based on discharges to post-acute care settings**
- **Ranking of hospitals and DRGs with greatest potential for admission to post-acute care settings**
- **Flexible, customized reports for local and regional markets**
- **Annual updates based on hospital discharges**
