

MEDICAL CHART AND DOCUMENTATION AUDITS IMPROVE REIMBURSEMENT RESULTS

Morrison Informatics medical chart and documentation audits can lead to increases in reimbursement for LTAC and rehabilitation hospitals. Based on over 5,000 chart audits completed, the range of reimbursement opportunities identified for hospitals is from \$150,000 to over \$1 million per year.

Medical chart and documentation audits include:

- **A statistically reliable sample of medical charts including all documented diagnoses, procedures, ancillary and specialized services**
- **Complete and detailed review of physician documentation**
- **Use of the most recent, updated CMS, Coding Clinic, ICD-9-CM, and AHIMA coding guidelines**
- **Analysis of reimbursement results based on current coding and identification of reimbursement opportunities**
- **Comprehensive Audit and Documentation Report with detailed recommendations for coding and documentation improvements**
- **Coding and documentation training for coders, physicians and related staff**
